Deadline for manuscript  
submissions:

**31 August 2025**

### Message from the Guest Editors

Dear Colleagues,

The special issue on acute viral infection complications delves into post-acute sequelae (PASC) or long COVID, exploring its mechanisms, clinical manifestations, and management. It covers immune-mediated complications, such as autoimmune disorders, triggered by viral mimicry or dysregulated immune responses. The issue also addresses neurological, respiratory, cardiovascular, and pregnancy-related complications arising from viral infections. Through research articles and case studies, it aims to enhance understanding of these complications, informing clinical practice, public health strategies, and ongoing research for better patient outcomes globally.

## Message from the Editor-in-Chief

*Viruses* (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **MEDLINE**, **PMC**, **Embase**, **PubAg**, **AGRIS**, and **other databases**.

**Journal Rank:** JCR - Q2 (Virology) / CiteScore - Q1 (Infectious Diseases)
