submissions:

**31 October 2024**

### Message from the Guest Editor

Dear Colleagues,

Wildlife adaptation to anthropogenic environments, termed synanthropy, significantly increases zoonotic viral spillover risks, where pathogens transfer from animals to humans, possibly triggering infectious disease outbreaks. This dynamic is fueled by urbanization, habitat fragmentation, and agricultural modifications, disrupting wildlife habitats and prompting animals to venture into human areas. Instances such as Ebola and Severe Acute Respiratory Syndrome (SARS) highlight the emergence of zoonotic diseases from such interactions. Mitigation efforts focus on wildlife and livestock surveillance, habitat conservation, and minimizing human–wildlife contact to avert future pandemics. This Special Issue invites manuscripts exploring viral diseases originating from synanthropic interactions, aiming to deepen understanding and develop interventions.

Dr. João R. Mesquita

## Message from the Editor-in-Chief

*Viruses* (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.**

**Journal Rank:** JCR - Q2 (*Virology*) / CiteScore - Q1 (Infectious Diseases)
