Deadline for manuscript
submissions:
closed (31 December 2022)

Message from the Guest Editor

Dear Colleagues,

We are interested in highlighting your work on other viruses during the COVID-19 pandemic, including how the pandemic may have impacted on these other virus infections in terms of diagnostics, surveillance, epidemiology, clinical management, infection control, etc.

Has the pandemic changed and improved the way you address other viruses—or not—in the laboratory or wards, including infection control?

Original papers, reviews and commentaries are welcome.

Prof. Dr. Julian Tang

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.**

Journal Rank: JCR - Q2 (*Virology*) / CiteScore - Q1 (Infectious Diseases)
