

HIV Infection and Spread between T Cells

Guest Editors:

Dr. Clare Jolly

Division of Infection and
Immunity, University College
London, Gower Street, London,
UK

Dr. Philip Tedbury

Department of Pediatrics, Emory
University School of Medicine,
Atlanta

Deadline for manuscript
submissions:

closed (22 December 2021)

Message from the Guest Editors

The aim of this Special Issue of *Viruses* is to provide an up-to-date view of HIV-1 infection and spread between CD4+ T cells, including new insights into the molecular and cellular biology of HIV-1 - T cell interactions, viral pathogenesis, immune evasion, and HIV-1 reservoirs/latency. We encourage the submission of all types of manuscripts (e.g., reviews, research articles, and short communications) pertaining to HIV-1 replication in T cells from in vitro and in vivo studies, including, but not limited to, the following topics:

1. Cell biology of HIV-1 infection and replication in T cells
2. Virus-host interactions that promote and/or restrict HIV-1 infection of T cells
3. Innate immune sensing and evasion during HIV-1 infection of T cells
4. New insights into HIV-1 cell-to-cell spread
5. The establishment, maintenance and clearance of T cell reservoirs and latently infected cells.
6. New experimental advances for studying HIV-1 infection T cells

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.**

Journal Rank: JCR - Q2 (*Virology*) / CiteScore - Q1 (Infectious Diseases)
