Deadline for manuscript  
submissions:  
**closed (30 June 2022)**

### Message from the Guest Editor

Dear Colleagues,

Interdisciplinary research by teams that integrates information, data, techniques, tools, and/or theories from two or more research fields advances fundamental understanding and solves problems in biology. The current COVID-19 pandemic boosted virus research through collaborations with various specialists in conjunction with recent advances in technology, highlighting the importance of interdisciplinary research in virology that is beyond the scope of the traditional field.

In this Special Issue of *Viruses*, we will focus on virus research performed by researchers from two or more disciplines. We welcome original research articles and reviews across a broad range of virus research from virus molecular biology and pathogenesis to antiviral agents and therapy.

Dr. Yoshitaka Sato  
*Guest Editor*

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Viruses* (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.**

**Journal Rank:** JCR - Q2 (*Virology*) / CiteScore - Q1 (Infectious Diseases)
