Message from the Guest Editors

Dear Colleagues,

This Special Issue, entitled “Influenza Virus Neuraminidase: Structure, Evolution, and Therapeutics”, aims to present recent research on several aspects of influenza neuraminidase (NA). Some of its focal points include, but are not limited to, the following:

1. Protein structure;
2. Genetic evolutionary changes and pathways;
3. Selective pressure;
4. Targeted antivirals: licensed and novel approaches/inhibitors;
5. Antiviral resistance and reduced susceptibility;
6. NA-based monoclonal antibodies;
7. NA as a vaccine antigen.

Reviews, original research articles, brief reports, and communications from academia, research institutes, or industries are welcome.

Dr. Helena Rebelo-De-Andrade

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.**

Journal Rank: JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)
