Message from the Guest Editors

Dear Colleagues,

In the present issue, we will focus on studies aiming at:

- Innate immune response against coronaviruses, also including ssRNA viruses belonging to other families of viruses, PRR and PAMPS identification, inflammatory response and its regulation, and virus escape strategies.
- Adaptive immune responses for vaccines development against anti-SARS-CoV-2 and new strategies for vaccine development.
- Tropism of coronaviruses, including the role of glycosylation.
- Biochemical, structural and functional characterization of SARS-CoV-2 gene products.

Prof. Dr. Elmostafa Bahraoui

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.**

Journal Rank: JCR - Q2 (*Virology*) / CiteScore - Q1 (Infectious Diseases)
