### Message from the Guest Editors

Dear Colleagues,

HTLV infection is frequently detected in some areas of the world. In Latin America, several countries have documented endemic areas. To date, there is no specific treatment for HTLV infection, and many aspects of the infection remain obscure. HIV infection is also endemic in Latin American countries, and despite increasing access to antiretroviral therapy, there are still many new infections and deaths caused by HIV every year. Coinfection by HIV and HTLV is also a frequent finding, and its consequences can be reciprocal.

This Special Issue will focus on different aspects of HTLV and HIV infections in Latin America. Epidemiological data, interaction with other infectious diseases, prognostic biomarkers, therapeutic approaches, and aspects of immune response are points of interest. In addition, any relevant information on the results of such problems will be also welcome. We will encourage reports on all information potentially relevant to Latin American countries.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.**

**Journal Rank:** JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)
