Deadline for manuscript  
submissions:

**closed (30 April 2021)**

### Message from the Guest Editor

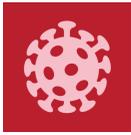

Dear Colleagues,

Stephen Oroszlan was a pioneer in the analysis of retroviral proteins. His groundbreaking contributions to the field paved the way for the development of inhibitors of retroviral proteases, now among the most potent weapons in our arsenal of anti-HIV-1 therapies.

Sadly, Steve passed away in May 2020. *Viruses* is planning a Special Issue in honor of his work and scientific legacy. We invite submissions on subjects related to Steve's work, such as proteolysis in viral maturation, post-translational modifications of viral proteins, recoding mechanisms used by viruses, etc., particularly those reporting recent progress in these fields. Original research reports, reviews, and brief commentaries on Steve's influence on the field would all be welcome.

Dr. Alan R. Rein  
*Guest Editor*

an Open Access Journal by MDPI

## Editor-in-Chief

### Dr. Eric O. Freed

Director, HIV Dynamics and Replication Program, Center for Cancer Research, National Cancer Institute, Frederick, MD 21702-1201, USA

## Message from the Editor-in-Chief

*Viruses* (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.**

**Journal Rank:** JCR - Q2 (*Virology*) / CiteScore - Q1 (Infectious Diseases)
