National Reference Centre for Rabies, Canadian Food Inspection Agency, Ottawa, ON, Canada (retired)

Deadline for manuscript submissions:

closed (15 January 2023)

Message from the Guest Editor

Dear Colleagues,

This Special Issue will be devoted to state-of-the-art research on rabies and its etiologic agents with particular focus on the following themes: improved knowledge of the diversity, evolution, and range of all members of the *Lyssavirus* genus; use of molecular genetic tools, including reverse genetics, and associated analytical methods to better understand viral transmission dynamics, especially as this relates to virus–host relationships and the role of specific viral proteins in pathogenesis; and significant developments in vaccination strategies for animal vectors of the disease. Novel methods of rabies diagnosis, with particular emphasis on point-of-care techniques amenable to use in remote regions, are also invited. Original research reports as well as review articles will be considered.

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.**

Journal Rank: JCR - Q2 (*Virology*) / CiteScore - Q1 (Infectious Diseases)
