Deadline for manuscript  
submissions:  
**closed (30 April 2023)**

### Message from the Guest Editors

Dear Colleagues,

Avian reoviruses are important pathogens that cause considerable losses to the poultry industry. To date, the rapid progression in avian virus research worldwide has resulted in numerous achievements that have contributed to the development of innovative techniques and advanced approaches and the timely resolution of urgent issues. In this Special Issue, research articles, short communications, and review papers on all research aspects of avian orthoreoviruses are highly welcome.

## Message from the Editor-in-Chief

*Viruses* (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.**

**Journal Rank:** JCR - Q2 (*Virology*) / CiteScore - Q1 (Infectious Diseases)
