Deadline for manuscript  
submissions:

**closed (30 November 2018)**

### Message from the Guest Editors

Dear Colleagues,

This Special Issue is related to the conference "[Viruses 2018–Breakthroughs in Viral Replication](#)" which will be held at the University of Barcelona, Barcelona, Spain, 7–9 February, 2018.

Viral infections continue to cause substantial morbidity and mortality in humans and all other living organisms. Wave upon wave of viral pandemics are having a major impact on global health. At the same time, great strides are being made in understanding at the molecular, cellular, organismal and epidemiological level how viruses replicate and induce pathology. This increase in knowledge is being translated into new treatments and vaccines for many viral infections.

Symposium participants, as well as all researchers working in the field, are cordially invited to contribute original research papers or reviews to this Special Issue of *Viruses*, which will focus on the progress being made in understanding virus replication, structure, transmission, pathogenesis, and antiviral immunity.

Dr. Eric O. Freed

Dr. Albert Bosch

## Message from the Editor-in-Chief

*Viruses* (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.**

**Journal Rank:** JCR - Q2 (*Virology*) / CiteScore - Q1 (Infectious Diseases)
