Ecology and Theoretical Biology,
Institute of Biology, Eötvös
Loránd University, Budapest,
Hungary

Deadline for manuscript
submissions:

31 December 2024

Message from the Guest Editor

Dear Colleagues,

Computational approaches have been used to study viruses at all levels of organization: from the molecular processes that occur within infected cells, through the dynamics of populations of virions and cells inside infected hosts, up to the level of epidemics and transmission between hosts. Following up on the success of its first edition, this Special Issue invites submissions that involve computational methods (mathematical or simulation modeling, or data analysis) at any (or, for multiscale models, several) of these levels to gain new insights into the fundamental processes, etiology, spread, and evolution of viral infections.

Dr. Viktor Müller

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.**

Journal Rank: JCR - Q2 (*Virology*) / CiteScore - Q1 (Infectious Diseases)
