Message from the Guest Editor

Dear Colleagues,

Today, in the age of omics, a wealth of evidence points to the remarkable distribution and diversity of cyanophages and algal viruses across the globe. Efforts to identify these viruses and study their biology, genomics, ecology, and evolution through innovative approaches will open new windows for advances in this field.

In this Special Issue, we aim to compile the latest research on aquatic viruses, with a particular focus on cyanophages and algal viruses. We welcome the submission of original research and review articles that cover different topics, including the description of new viruses, elucidation of virion structure, genomics and evolutionary aspects of aquatic viruses, viral ecology, and the impact of these viruses in different environments. We strive to present a comprehensive collection of up-to-date research in this broad and fascinating field of virology.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.**

Journal Rank: JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)
