Message from the Guest Editors

Dear Colleagues,

When viruses infect their hosts, they conscript normal cellular processes and exploit them to enable their replication and ability to cause disease. Hosts have evolved defenses against virus infection, and viruses have consequently evolved the means to evade these defenses. Because of this ongoing evolutionary arms race, the host response to infection is a crucial determinant of pathogenesis. However, major gaps remain in our understanding of the interactions between host and pathogen that contribute to disease.

For this Special Issue of *Viruses*, entitled “Host Factors in Virus Infections”, we invite original research, review, and perspective pieces focusing on the host-pathogen interface.

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **MEDLINE**, **PMC**, **Embase**, **PubAg**, **AGRIS**, and **other databases**.

Journal Rank: JCR - Q2 (*Virology*) / CiteScore - Q1 (Infectious Diseases)
