Message from the Guest Editor

Dear Colleagues,

Influenza virus is a significant zoonotic pathogen that is widely distributed throughout China, posing a significant threat to domestic poultry farms and public health. In this Special Issue, we aim to assemble a collection of research papers that highlight the state-of-the-art influenza research in China. Within the issue, we would like to focus on epidemiology, transmission, the development of novel diagnostic assays, the development of vaccines, and the biology and molecular pathogenesis of the virus. Of particular interest are the transmission of the virus via wild birds, the interplay between the virus and host immune responses, and the innate immune pathways modulated by the virus. We welcome original research articles and comprehensive reviews across a broad range of topics on influenza virus.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.**

Journal Rank: JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)
