Department of Microbiology and Immunology, Taipei Medical University, Taipei, Taiwan

**Prof. Dr. Ya-Chung Tian**

Department of Nephrology, Chang Gung Memorial Hospital, Linkou Main Branch, Taoyuan City, Taiwan

Deadline for manuscript submissions:

**closed (1 April 2023)**

### Message from the Guest Editors

Dear Colleagues,

Taiwan has experienced several viral epidemics and outbreaks over the past few decades, including enteric viruses, dengue virus, hepatitis viruses, influenza viruses, and rabies virus, and has faced both SARS and COVID-19 pandemics. These viral diseases are of clinical importance to the Taiwanese population. Taiwan's agriculture is also at risk of important animal and plant viruses that affect livestock, crops, and aquaculture and has observed continuous research efforts in these areas as well. At the same time, emerging research in Taiwan has seen the development of viruses in cancer therapy (e.g., oncolytic viruses) and biotechnology applications (e.g., phage display).

This Special Issue covers all aspects of virology research in Taiwan and we invite researchers in Taiwan to submit to this Special Issue.

Director, HIV Dynamics and Replication Program, Center for Cancer Research, National Cancer Institute, Frederick, MD 21702-1201, USA

## Message from the Editor-in-Chief

*Viruses* (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.**

**Journal Rank:** JCR - Q2 (*Virology*) / CiteScore - Q1 (Infectious Diseases)
