Deadline for manuscript submissions:

closed (1 April 2023)

Message from the Guest Editors

Dear Colleagues,

Taiwan has experienced several viral epidemics and outbreaks over the past few decades, including enteric viruses, dengue virus, hepatitis viruses, influenza viruses, and rabies virus, and has faced both SARS and COVID-19 pandemics. These viral diseases are of clinical importance to the Taiwanese population. Taiwan's agriculture is also at risk of important animal and plant viruses that affect livestock, crops, and aquaculture and has observed continuous research efforts in these areas as well. At the same time, emerging research in Taiwan has seen the development of viruses in cancer therapy (e.g., oncolytic viruses) and biotechnology applications (e.g., phage display).

This Special Issue covers all aspects of virology research in Taiwan and we invite researchers in Taiwan to submit to this Special Issue.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.**

Journal Rank: JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)
