

Visual Orienting and Conscious Perception

Guest Editor:

Prof. Dr. Anthony James Lambert

School of Psychology and Centre for Brain Research, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Deadline for manuscript submissions:

closed (30 June 2019)

Message from the Guest Editor

In keeping with the overall aim of the journal, to stimulate useful interchange between individuals working primarily on basic theoretical issues, and those working on more applied aspects of vision science, we invite papers on a range of topics related to the theme of “Visual Orienting and Conscious Perception”. Papers that seek to bridge the gap between theoretical and applied aspects of visual orienting and conscious perception will be especially welcome. A range of potential topics for this Special Issue is provided below. However, this should be viewed as a suggestive list, rather than an exhaustive catalogue.

- Endogenous and exogenous orienting
- Overt and covert visual orienting
- Conscious (e.g., vision for perception) and non-conscious (e.g., vision for action) aspects of visual function
- Eye movements and conscious awareness
- Looking without seeing—e.g., inattentional blindness, change blindness, repetition blindness
- Visual orienting and attentional failures inside and outside the laboratory
- Vision for action and eye movement control
- Clinical disorders that impair visual orienting and/or conscious visual perception

Department of Physiology,
Anatomy and Genetics, University
of Oxford, Oxford OX1 3PT, UK

Message from the Editor-in-Chief

Vision research has developed tremendously over the last years and has been well served by some of the available journals. We feel that a new journal, with no historical or societal affiliations, offers a chance for a broad interdisciplinary coverage and a means of highlighting the increasing number of interesting results and ideas. We are therefore convinced that the launch of a truly interdisciplinary journal in the area of vision science is worthwhile, timely and necessary. *Vision* is a journal for, and by, all vision scientists, committed to the advancement of their field of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, PMC, and other databases.

Journal Rank: CiteScore - Q2 (*Ophthalmology*)
