Research on Coastal Water Quality Modelling

Guest Editor:

Dr. Qianqian Liu

Physics and Physical
Oceanography, University of
North Carolina Wilmington,
Wilmington, NC, USA

Message from the Guest Editor

This Special Issue focuses on the advancement and application of coastal water quality modeling, including (but not limited to) biogeochemical, statistical, and machine learning models.

Keywords

- coastal water quality
- model
- water management
- advancement
- application
- biogeochemical models
- statistical models
- machine learning models

Deadline for manuscript
submissions:

20 September 2024

Special Issue

water

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Jean-Luc PROBST

Laboratory of Functional Ecology and Environment, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
