Deadline for manuscript
submissions:

closed (30 June 2023)

Message from the Guest Editors

Dear Colleagues,

Geomicrobes are widely distributed in various extreme environments, such as acid mine drainage (AMD), hot spring, reservoir, and deep subsurface. Functional extremophiles are very powerful forces that shape our planet's environment.

We sincerely invite contributions to this Special Issue on aspects listed in the following keywords, covering recent advances and innovations in extreme environments, which will be of interest to researchers and practitioners in the geomicrobiology field. The topics of interest include but are not limited to:

- Acidophiles in AMD;
- Halophilic archaea in saline lakes;
- Deep-sea hydrothermal vents;
- Virus in extreme environments;
- Sulfur-reduction microorganisms in hot springs;
- Hydrocarbon degradation bacteria in subsurface biosphere;
- Groundwater microorganisms in a Karst environment.

Keywords:

- geomicrobiology
- C/N/S cycling
- arsenic
- extremophile
- Fe(II)/Fe(III)
- mineral

Special Issue

water

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Jean-Luc PROBST

Laboratory of Functional Ecology and Environment, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
