## Water-Related Geoenvironmental Issues

Guest Editors:

**Prof. Dr. Echuan Yan**

Faculty of Engineering, China  
University of Geosciences, Wuhan  
430074, China

**Prof. Dr. Ming Zhang**

Faculty of Engineering, China  
University of Geosciences, Wuhan  
430074, China

**Dr. Jingsen Cai**

Faculty of Engineering, China  
University of Geosciences, Wuhan  
430074, China

Deadline for manuscript  
submissions:

**closed (31 March 2024)**

### Message from the Guest Editors

This Special Issue collects articles from the research on fundamental and up-to-date scientific results related to water-related geoenvironmental issues. Articles are welcome on topics associated with numerical modeling, spatiotemporal modeling, data fusion, and field investigation using hydrogeological approaches, geophysical approaches, geochemical approaches, and remote sensing. We also welcome studies associated with groundwater contamination transport and remediation, geothermal energy exchange, and geological disasters and environmental disasters evaluation and prevention. We especially encourage water-related geoenvironmental studies that solve multi-scale and interdisciplinary problems[...]

## Editor-in-Chief

### Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
