Advances in Approaches to Future Water Visioning and Communication

Guest Editors:

Dr. Sarah Ward

Westcountry Rivers Trust,
Callington, UK

Dr. David Forrow

Environment Agency,
Rotherham, UK

Deadline for manuscript
submissions:

closed (10 November 2023)

Message from the Guest Editors

Water landscapes, infrastructure, policy, strategy and governance will all look very different in response to climate change and mitigation measures, circularity, inclusivity and sustainability, as paradigms shift, scenarios transform and systems transition. The ways in which these changes are visualised and communicated will also evolve and shift to better serve co-design and co-creation, which are at the core of emerging approaches. In this Special Issue we explore these transformations and evolutions through papers focused on articulating Advances in Approaches to Future Water Visioning and Communication. We are seeking novel papers that showcase these approaches and advances, which may cover but are not limited to:

- Innovations (of all types) in the water–energy–food nexus;
- Socio-ecological-technical systems of the future;
- Experimental techniques for water/environment/climate visualisation and communication;
- Future visioning approaches and analysis, and/or real-world application.

Special Issue

water

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Jean-Luc PROBST

Laboratory of Functional Ecology and Environment, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
