Managing Water Resources Sustainably

Guest Editor:

Dr. Mariacrosetta Sambito

School of Engineering and
Architecture, University of Enna
"Kore", 94100 Enna, Italy

Deadline for manuscript
submissions:

28 November 2024

Message from the Guest Editor

I am pleased to invite you to participate in our **Special Issue**, focused on assessing water quality in watersheds and urban drainage systems.

Water is a key environmental, sociological and economic risk in many parts of the world, making sustainable management of water resources crucial. For this reason, your participation and contribution to this special issue would be extremely valuable in deepening the understanding of these crucial issues and in advancing environmental management strategies. This special issue welcomes research papers that discuss the possibility of integrating sustainability principles within engineering, addressing specific and general methods (monitoring and evaluation techniques) and approaches (models, decision support tools, management actions, political insights and governance). Papers selected for this special issue will be subject to a rigorous peer review procedure with the aim of rapid and wide dissemination of research findings, developments and applications. We therefore encourage you to submit your contributions on this topic by the indicated deadline and join us in promoting research and solutions to improve water quality.

Special Issue

water

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Jean-Luc PROBST

Laboratory of Functional Ecology and Environment, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
