Sustainable Water Reuse and Water Economics

Guest Editor:

Prof. Dr. Francesc Hernández-Sancho

Water Economics Group, Inter-University Institute of Local Development (IILD-WATER), University of Valencia, 46022, Valencia, Spain

Deadline for manuscript submissions:

25 January 2025

Message from the Guest Editor

The issue of climate change requires us to adopt new approaches to water management to ensure the sustainability of this resource. The implementation of a strategy based on water reuse is key to ensuring its present and future availability. In this context, the wastewater treatment sector acquires special relevance to achieve the quality of the reclaimed water according to the requirements of each use. In this way, reclaimed water becomes a new alternative water resource that ensures the availability of water while reducing the pressure on conventional water supplies, guaranteeing this resource's sustainability.

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Jean-Luc PROBST

Laboratory of Functional Ecology and Environment, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
