Institute of Environmental  
Engineering and Building  
Installations, Lodz University of  
Technology, Lodz, Poland

Deadline for manuscript  
submissions:

**closed (20 January 2024)**

### Message from the Guest Editor

Water is one of the most important resources on Earth. The quantity and quality of water resources are essential to the health of the population, and to all sectors of the economy, making it a determining factor in society's standard of living. Urban wastewater usually contains different substances (e.g., chemicals and mixtures of chemicals) that can be toxic and have a negative effect on environmental resources. Urban wastewater treatment and environmental sustainability are the only ways to conserve natural resources, including water, and protect global ecosystems.

The aim of this Special Issue of *Water* is to present the latest reports related to urban wastewater treatment and environmental sustainability. Authors are encouraged to present their research and review papers on urban wastewater treatment, as well as articles on wastewater toxicity and estrogenicity.

## Editor-in-Chief

### **Dr. Jean-Luc PROBST**

Laboratory of Functional Ecology and Environment, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, France

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
