closed (10 July 2022)

Message from the Guest Editors

Dear Colleagues,

Public participation and stakeholder involvement are considered key for integrated water governance arrangements and have increasingly become prerequisites for decision-making processes in water management. The European Water Framework Directive is a case in point, where the inclusion of interested parties in decision-making processes is a central tenet of river basin planning. The promotion of stakeholder engagement is also at the core of the OECD water governance principles. Despite the general agreement on the importance of participation, its optimal form and function are still an issue that engages scholars and practitioners.

Much of the focus on public participation and stakeholder involvement has centered upon the involvement of representatives from the agricultural sector, a sector essential [...]

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
