## Innovating Water Treatment with AI, IoT, and Machine Learning: A Focus on Membrane Distillation

Guest Editors:

**Dr. Bandita Mainali**

Water Resources and  
Environmental Engineering,  
School of Engineering, Faculty of  
Science and Engineering,  
Macquarie University, Sydney,  
NSW 2113, Australia

**Prof. Dr. Muhammad Kashif  
Shahid**

Research Institute of  
Environment & Biosystem,  
Department of Environmental  
Engineering, Chungnam National  
University, Daejeon 34134,  
Republic of Korea

### Message from the Guest Editors

This Special Issue is designed to present the most recent research or comprehensive reviews related to the potential of AI, IoT, and Machine Learning in membrane distillation and other membrane-based water treatment processes. The Special Issue will contribute to the knowledge based on novel materials and membranes for improved water separation and fouling resistance, advanced sensors and monitoring systems for real-time water quality assessment, AI and Machine Learning algorithms for intelligent process optimization, fault detection, and predictive maintenance, IoT-enabled smart water systems for remote monitoring and management of water treatment plants, Cost-analysis, and life cycle assessment of AI, IoT, and Machine Learning-based water treatment systems.

Deadline for manuscript  
submissions:

**closed (15 October 2024)**

## Editor-in-Chief

### **Dr. Jean-Luc PROBST**

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR  
CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
