Opole, 45-032 Opole, Poland

Deadline for manuscript
submissions:

closed (15 October 2022)

Message from the Guest Editor

Dear Colleagues,

In modern methods of environmental quality research, biological indicators are becoming a permanent element of evaluation. The biological indicators of water quality include, among others, algae and angiosperm plants. These organisms show measurable morphological changes due to physicochemical changes in the ecosystems in which they live. In their organisms, they accumulate large amounts of pollutants, especially heavy metals. This enables the designation of zones with relatively different levels of pollution and the determination of the sources of pollution and the directions of its spread.

The challenges include the validation of biomonitoring methods and demonstration that biomonitoring can effectively compete with classical methods of monitoring surface water quality.

The aim of this Special Issue is to provide an overview of the latest trends in monitoring biological surface water. [...]

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
