### Message from the Guest Editors

The overall goal of [this Special Issue](#) of *Water* is to focus research and analyses on these areas, starting from high-quality databases of climatic variables. Interdisciplinary original research articles highlighting new ideas, approaches, and innovations in the spatial and temporal analysis of the main climatological variables (rainfall, temperature, wind, etc.) and the analysis of future scenarios using GCM projections are welcome.

Deadline for manuscript  
submissions:

**closed (21 August 2023)**

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
