Deadline for manuscript submissions:

### Message from the Guest Editor

The *Special Issue* of *Water* is devoted primarily to (1) illuminating the connections between groundwater and connected ecosystems; (2) improving knowledge of the close interdependency between known and/or hitherto insufficiently known or even unknown groundwater-related ecosystems that require access to groundwater to maintain their assemblages, ecological processes, and services; (3) defining variables that infer that relationship.

I am happy to invite you to submit a paper for this *Special Issue*, which will improve the knowledge base of the global scientific community, covering all groundwater-dependent ecosystems (GDEs).

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.
