Groundwater Resilience to Climate Change and High Pressure

Guest Editors:

Prof. Dr. Moumtaz Razack

Assoc. Prof. Dr. Bedri Kurtulus

Prof. Dr. Philippe Le Coustumer

Dr. Mohamed Meddi

Assist. Prof. Dr. Mustafa Can Canoğlu

Deadline for manuscript submissions:
closed (31 December 2020)

Message from the Guest Editors

Groundwater has over the past few decades become a fundamental resource for social, economic and environmental sustainability. The sustainability of groundwater is on the one hand linked to policy issues influencing water and land use, and represents one of the major global challenges in natural resource management. On the other hand, groundwater is technically complex. Practical advances in this field are urgently needed, so that technical experts and water managers can reach a common understanding. There is also a need to integrate groundwater and surface water management to ensure better overall water management and allocation.

This Special Issue of *Water* will focus on the resilience of groundwater resources facing increasingly high pressure exerted by the socio-economic world and facing climate variability and change. Papers on the following subjects are welcomed:

water

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.
Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
