80-266 Gdańsk, Poland

Prof. Dr. Magdalena Bogalecka

Department of Industrial
Products Quality and Chemistry,
Gdynia Maritime University,
Gdynia, Poland

Deadline for manuscript
submissions:
closed (30 June 2023)

Message from the Guest Editors

The problems of seas are caused by many onshore and offshore human activities, including eutrophication and its consequences (e.g., oxygen depletion and massive algae growth), as well as pollution with chemical compounds such as heavy metals, oils, microplastics, [...]

Thus, this Special Issue of *Water*, entitled Seas under Anthropopressure, is focused on the distribution of pollutants as well as their modelling, assessment, possibility of reduction, and inflow decrease.

The Special Issue will explore the following main topics:

- Marine biodiversity in seas as an indicator of anthropopressure;
- Invasive alien species in seas;
- Eutrophication, acidification, climate change, pollution, wastewater;
- Biodegradation in marine environment;
- Wastewater treatment;
- Environmental assessment;
- Seafood safety;
- Impact of maritime accidents on the environment;
- Modelling and simulation of pollution processes;
- Marine sustainability.

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
