Sustainable Water Governance through Indigenous Research Approaches

Guest Editors:

Prof. Dr. Deborah McGregor

Osgoode Hall law faculty, York
University, Toronto, ON, Canada

Prof. Dr. Aimee Craft

Faculty of Common law,
University of Ottawa, Ottawa, ON,
Canada

Deadline for manuscript
submissions:

closed (1 December 2020)

Message from the Guest Editors

In this volume, we address the question, “*How can Indigenous research paradigms and methodologies inform sustainable water governance and security?*” This call responds to the need for acceptance and utilization of diverse knowledge systems critical to addressing water governance and security at every level of society.

The contributors to this volume are a testament to the rich diversity of Indigenous research methods. We pose the following questions as guideposts for consideration:

1. How are Indigenous research paradigms and methods employed in water governance research?
2. How have Indigenous research methods been employed to support community-building projects related to water justice and governance?
3. How can Indigenous research support the realization of sustainable water governance now and in the future?

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
