University of Iasi, Iasi, Romania

Deadline for manuscript
submissions:

closed (31 March 2024)

Message from the Guest Editor

Sustainable water resource management still attracts interest at the international level, even though there are clear regulations, policies, and strategies for water quality protection. Moreover, the Sustainable Strategy Horizon 2030 defines, among other sustainable goals, the goal to “ensure availability and sustainable management of water and sanitation for all”, with targets concerning water quality, water-use efficiency, and water resources management that should be achieved. Priority inorganic and organic pollutants may significantly influence ecosystems and human health, even in small amounts or traces. Thus, sustainable withdrawals, supply of fresh water, and integrated water resources management at all levels, including transboundary cooperation [...]

Papers, reviews, and research are invited to be published in this issue, offering the opportunity to create an international scientific impact and address new research questions and future approaches and collaborations. Topics of particular interest include, but are not limited to:

- water quality
- pollution monitoring and treatment
- sustainable water resources management, impact, and risk assessment

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
