### Message from the Guest Editors

The aim of this Special Issue is to collate studies reporting on recent innovations and modern techniques, trends, and concerns, as well as the practical challenges encountered and solutions adopted in the fields of marine phytoplankton diversity and ecology. Research articles, reviews, notes, and comments are welcome. More info can be found at the link:

Deadline for manuscript  
submissions:

**closed (13 July 2022)**

- marine phytoplankton
- biodiversity
- ecology
- algal blooms and HABs
- genetic diversity
- eutrophication
- monitoring
- indicators
- satellite data and remote sensing
- environmental assessment

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
