Meshless Methods for Water Dynamics and Complex Flows

Guest Editors:

Dr. Xesús Nogueira

Universidade da Coruña, Spain

Prof. Dr. Sofiane Khelladi

Arts et Métiers Institute of
Technology, CNAM, LIFSE, HESAM
University, 75013 Paris, France

Deadline for manuscript
submissions:

closed (28 February 2021)

Message from the Guest Editors

Computational Fluid Dynamics (CFD) is with no doubt a fundamental tool in both science and engineering. It is ubiquitous in almost any research or design involving fluid flows. Historically, mesh-based methods have been the ones that have received the largest research efforts. However, meshless methods are a promising tool to solve some of the drawbacks of mesh-based methods. In particular, mesh generation is currently one of the most significant bottlenecks in CFD applications, since generally the mesh generation phase constitutes the dominant cost in terms of both human intervention and time. In this framework, meshless methods are specially suited for problems with large deformations of the computational domain. In the context of CFD, Smoothed Particle Hydrodynamics (SPH) is the most widely used meshless method for flow simulations. [...]

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
