Transport and Fate of Organic Contaminants in Water and Their Impact on Human Health

Guest Editor:

Dr. Sergei M. Chernyák

University of Michigan, School of Public Health, Ann Arbor, MI, USA

Deadline for manuscript submissions:

closed (31 March 2022)

Message from the Guest Editor

Dear Colleagues,

Dr. Chernyák is an expert in environmental chemistry with 50 years of research experience in laboratory methods for analysis of organic compounds in both biological and non-biological samples that bridge environmental, environmental health, and occupational health areas. He served as analytical chemist and scientist for USGS, the USDA, Environmental Chemistry Laboratory, and the Ministry of Geology and Environment Protection of Russia. He has been a member of several editorial boards at the US Fish and Wildlife Service, Russian Academy of Sciences, and Russian Meteorological Committee. At U-M, his work addressed a wide number of analytes and matrices, but much of his work focused on persistent compounds, including chlorinated pesticides, polychlorinated biphenyls, and other halogenated (i.e., brominated) hydrocarbons, polycyclic aromatic hydrocarbons, dioxins, furanes and other compounds in matrices include blood, urine, as well as air, soil, biota, and food. [...]

Special Issue

water

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Jean-Luc PROBST

Laboratory of Functional Ecology and Environment, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
