Review Papers of Water, Agriculture and Aquaculture

Guest Editor:

Prof. Dr. Steven G. Pueppke

Department of Plant, Soil and Microbial Sciences, Center for Global Change and Earth Observations, Center for European, Russian, and Eurasian Studies, Michigan State University, Okemos, MI, USA

Deadline for manuscript submissions:

closed (1 November 2024)

Message from the Guest Editor

This Special Issue, Review Papers of Water, Agriculture and Aquaculture, is designed to publish well written, high-quality reviews that critically examine all aspects of the relationship between water and food, especially poorly understood and under-appreciated aspects of the subject. It will encompass both food production on land (agriculture) and food production in water (aquaculture). Researchers are most welcome to contribute comprehensive review papers for consideration and publication in this Special Issue.

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. Water invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to technological scientific domains and interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Water Resources) / CiteScore - Q1 (Water Science and Technology)
