## Climate Change and Human Impact on Freshwater Water Resources: Rivers and Lakes

Guest Editors:

**Prof. Dr. Dariusz Wrzeński**

Department of Hydrology and Water Management, Adam Mickiewicz University, 61-712 Poznań, Poland

**Dr. Leszek Sobkowiak**

Department of Hydrology and Water Management, Adam Mickiewicz University, 61-712 Poznań, Poland

Deadline for manuscript submissions:

**closed (31 December 2021)**

### Message from the Guest Editors

Different patterns of phenomena observed in rivers (water stages, discharges, water temperature and chemistry, ice phenomena, etc.) in an average annual cycle, determined by climate and catchment properties, are relatively stable. Under the influence of changing climatic conditions and increasing human impact, a flow regime might destabilize and turn over to another with sometimes quite different seasonal patterns, thus disturbing the established hydroecological conditions and availability of water resources. ## Editor-in-Chief

### Dr. Jean-Luc PROBST

Laboratory of Functional Ecology and Environment, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, France

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
