Organization ELGO-DIMITRA, Nea
Peramos, 64007 Kavala, Greece

Deadline for manuscript
submissions:

15 April 2025

Message from the Guest Editor

This Special Issue aims to explore the latest advancements and emerging trends in ichthyoplankton research, emphasizing new methodologies and the ecological insights they provide. Ichthyoplankton, consisting of fish eggs and larvae, are crucial components of marine ecosystems, serving as indicators of water quality and predictors of future fish populations. This Special Issue will bring together studies that highlight innovative approaches to sampling, analyzing, and modeling ichthyoplankton. Articles that provide a deeper understanding of ichthyoplankton distribution patterns, survival rates, and their responses to environmental changes are particularly welcome, as well as methodological studies about sampling ichthyoplankton. By showcasing interdisciplinary research and technological innovations, this Special Issue will offer valuable perspectives on how ichthyoplankton studies can inform broader ecological theories and practical conservation efforts.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
