Prediction and Prevention of Risks Related to Hydro-Geotechnical Hazards

Guest Editor:

Prof. Dr. Ali Saeidi

Department of Applied Sciences,
University of Quebec at
Chicoutimi, Saguenay, QC,
Canada

Deadline for manuscript
submissions:

closed (30 April 2023)

Message from the Guest Editor

Over the last few decades, hydro-geotechnical hazards have caused significant damage to both natural and human-made environments all over the world. These hazards, such as floods, landslides, and earthquakes, threaten socio-economic activities and the operational safety and stability of infrastructure, cause several billion dollars of damage, and more importantly, they are responsible for several deaths [...]

This Special Issue focuses on the risks associated with hydro-geotechnical hazards and invites submissions that exploit state-of-the-art research, case studies, and lessons learned through failures, including but not limited to earth dam embankment stability, rock erosion of dam spillways, rainfall-induced landslides, geotechnical problems associated with water, landslide risk prediction and evaluation, triggering and failure mechanisms, numerical modeling and GIS application for hazard zonation, etc.

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Jean-Luc PROBST

Laboratory of Functional Ecology and Environment, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
