Constructed Wetland Systems for Wastewater Treatment and Water Remediation

Guest Editor:

Prof. Dr. Haiming Wu

School of Environmental Science
and Engineering, Shandong
University, Qingdao 266237,
China

Deadline for manuscript
submissions:

31 March 2025

Message from the Guest Editor

To support the successful application and further development of CWs, this research topic will focus on but not be limited to the following scopes:

- Recent advances in the application of CWs for treating various types of wastewater and water remediation;
- Selection and performance evaluation of plants and substrates;
- Biogeochemical processes and ecological risks for removing emerging contaminants;
- The effects and feedbacks of CWs under extreme climate events;
- Novel enhancing approaches and optimizing strategies in CWs for wastewater treatment.

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
