Sustainable Water Supply, Sanitation and Wastewater Systems

Guest Editors:

Prof. Dr. Satoshi Takizawa

Graduate School of Engineering,
University of Tokyo, Tokyo, Japan

**Prof. Dr. Thammarat
Koottatep**

School of Environment,
Resources and Development,
Environmental Engineering and
Management, Asian Institute of
Technology, Pathum Thani,
Thailand

Prof. Dr. Kazuaki Syutsubo

Regional Environmental
Conservation Division, National
Institute for Environmental
Studies (NIES), 16-2 Onogawa,
Tsukuba, Ibaraki 305-8506,
Japan

Deadline for manuscript
submissions:

closed (15 December 2023)

Message from the Guest Editors

Dear Colleagues,

Protecting the natural water environment is one of the most important issues in Asian countries. However, water pollution control in Asian countries is a difficult task due to rapid population and economic growth, and limited resources and investments. As a result of water pollution, pristine water sources are shrinking, and drinking water sources are under threat, causing detrimental health impacts and making it difficult to achieve SDG 6. Meanwhile, because of small investment costs and rapidly evolving technologies, decentralized water supply and wastewater systems could address the above-mentioned problems in Asian countries. This Special Issue aims to share the current issues, efforts and technological developments helping to achieve SDG 6 in Asian countries. We welcome papers on safely managed sanitation in Asian countries, including fecal sludge management and sewer vs. non-sewered systems, as well as studies on supplying safe drinking water via piped and individual sources, [...]

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
