Ferrara, Italy

Dr. Tania Mazzuca Sobczuk

Chemical Engineering
Department, University of
Almeria, Almeria, Spain

Deadline for manuscript
submissions:

30 January 2025

Message from the Guest Editors

This Special Issue aims at gathering scientific contributions (original research articles, short communications, and comprehensive reviews) on microalgae in a broad thematic scenario, emphasizing their implications and future challenges in the context of strong changes in the environment, climate, as well as in society and human habits.

Topics of interest include, but are not limited to, the following:

- Phytoremediation;
- The production of microalgae biomass for food/feed, cosmeceuticals, nutraceuticals, and pharmaceuticals;
- Valorization of waste (by-products and wastes/wastewaters);
- Microalgae cultivation solutions (production and harvesting);
- Algal bloom control;
- Microalgae and the circular economy;
- Microalgae and the SDGs (Sustainable Development Goals);
- The control and/or valorization of harmful microalgae.

Editor-in-Chief

Dr. Jean-Luc PROBST

Laboratory of Functional Ecology and Environment, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
