2. Department of Integrative Marine Ecology, Stazione Zoologica Anton Dohrn, Villa Comunale 1, 80121 Naples, Italy

3. National Inter-University Consortium for Marine Sciences (CoNISMa), Piazzale Flaminio 9, 00196 Roma, Italy

Dr. Tomás Vega Fernández

Stazione Zoologica Anton Dohrn di Napoli-Istituto Nazionale di Biologia, Ecologia e Biotecnologie Marine, Villa Comunale, 80121 Naples, Italy

Deadline for manuscript submissions:

closed (31 October 2023)

Message from the Guest Editors

In the last several decades, organic pollution and eutrophication, habitat alteration and destruction, overexploitation of biological resources, changed sediment transportation and deposition rates, release of litter in the marine environment, spread of non-indigenous species, and alteration of biogeochemical cycles have often resulted in changes in the structure of communities and ecosystems. Shallow areas along coasts are affected by numerous pressures, since over one-third of the global human population live within 100 km of marine coast. For this reason, coastal areas are recognised as one of the most pressured and threatened habitats worldwide. This Special Issue explores the effects of anthropogenic pressures, including those driven by climate disturbances, on marine habitats, species, communities, and ecosystems. Multidisciplinary studies based on laboratory and field experiments, systematic reviews, meta-analyses, and syntheses of the available scientific information are encouraged.[...]

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
