Athens University of Economics and Business, Athens, Greece

Dr. Ebum Akinsete

ICRE8 (The International Centre for Research on the Environment and the Economy)

Deadline for manuscript submissions:

closed (28 February 2019)

Message from the Guest Editors

Dear Colleagues,

Water constitutes a crucial input for development in all sectors of the economy; as such its optimal management remains a critical challenge for policy makers, industry practitioners, and academics alike. This Special Issue focuses on economic approaches to sustainable management of water as a resource. We invite reviews, as well as original research articles, which seek to explore the intersection between issues to do with water-use, economic resource management, and sustainable development as it applies to this context.

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
