Message from the Guest Editors

Dear Colleagues,

Advanced Applications of Electrocoagulation in Water and Wastewater (AAEWW) is a Special Issue of *Water* devoted to the interdisciplinary subject of electrocoagulation and all aspects related to water and wastewater, both theoretical and applied. AAEWW focuses on the publication of both original work and reviews in the field of electrocoagulation treatment. AAEWW provides fast dissemination of original articles, reviews, short communications, and full communications covering the whole field of electrocoagulation applications in water and wastewater. Short communications are limited to a maximum of 21,000 characters (including spaces) whereas full communications are limited to 26,000 characters (including spaces). We aim to be the fastest-published Special Issue in the journal.

AAEWW welcomes the research fields covered by the following areas: [...]

Dr. Jean-Luc PROBST

Laboratory of Functional Ecology and Environment, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
