Geochemistry of Mineral Groundwater

Guest Editors:

Prof. Dr. Tadeusz A. Przylibski

Faculty of Geoengineering,
Mining and Geology, Wrocław
University of Science and
Technology, Wybrzeże S.
Wyspiańskiego 27, 50-370
Wrocław, Poland

Dr. Dariusz Dobrzyński

University of Warsaw, Faculty of
Geology, Department of Applied
Hydrogeology and Geophysics,
Warsaw, Poland

Deadline for manuscript
submissions:

closed (30 September 2022)

Message from the Guest Editors

We would like to dedicate the next Special Issue of the journal *Water* to the problem of the formation of chemical and isotopic composition of groundwaters. We intend to place special emphasis on the processes of formation and evolution of the chemistry of groundwaters of infiltration origin. What is particularly interesting here are water–reservoir rocks interaction processes and the mixing of water components circulating in different conditions and within various geological structures. Our scope of interest comprises both general discussion of groundwater composition development processes and more detailed issues related to particular groundwater reservoirs on a regional scale, and, for waters with particularly interesting chemistry or physico-chemical feature forming processes, also locally, [...]

Editor-in-Chief

Dr. Jean-Luc PROBST

Laboratory of Functional Ecology and Environment, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
