## Groundwater Chemistry and Quality in Coastal Aquifers

Guest Editors:

### **Prof. Dr. Guanxing Huang**

Institute of Hydrogeology and Environmental Geology, Chinese Academy of Geological Sciences, Shijiazhuang, China

### **Dr. Liangping Li**

Department of Geology and Geological Engineering, South Dakota School of Mines and Technology, Rapid City, SD 57701, USA

Deadline for manuscript submissions:

**closed (15 December 2023)**

### **Message from the Guest Editors**

We are pleased to invite you to contribute to this Special Issue. This Special Issue focuses on groundwater chemistry and quality in coastal aquifers within the scope of the journal *Water*.

This Special Issue aims to advance our understanding of the evolution of groundwater chemistry and the status of groundwater quality in coastal areas worldwide. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Assessment and status of groundwater quality in coastal areas;
- Factors controlling groundwater quality in coastal areas;
- Characteristics and evolution of groundwater chemistry in coastal areas;
- Natural background levels of elements in groundwater of coastal aquifers.

## Editor-in-Chief

### **Dr. Jean-Luc PROBST**

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
